

Index to Communications of the ACM Volume 17, 1974

BIBLIOGRAPHY AUTHOR INDEX DEPARTMENT INDEX

Entries in this Index are technical papers, short communications, award papers, educational reports, special papers, and topical articles. Algorithms are indexed separately; the "Index by Subject to Algorithms 1974" is on page 719 of this issue.

The KEY in each entry gives the year and volume number (7417), the issue number (which is also the number of the month), and the beginning page number.

The BIBLIOGRAPHY lists the entries in order of original appearance; each entry gives the title and the name(s) of the author(s).

The AUTHOR INDEX lists the entries in order of alphabetized authors' names. If there is more than one author

for a paper, each author is listed separately in alphabetical order; therefore, in this section a single entry would not include co-author's names.

The DEPARTMENT INDEX groups technical papers and short communications according to the technical departments for which they were designated. Other papers are listed last under the heading Reports and Articles.

1974 Index by Subject to Algorithms

Algorithms published elsewhere are included. Each entry gives the key to the classification system categories (A1, B1, ...); the number of the algorithm if in CACM; abbreviated title with language designator (A for Algol, F for Fortran, etc.); then month, year, page (in parentheses) in CACM, or if published elsewhere, journal designator, volume, year, page, (in parentheses). A cumulative index to algorithms published in CACM from 1960 through 1973 may be consulted in "Collected Algorithms from CACM," which is a looseleaf collection of all the algorithms, each with certifications and remarks, if any, appended.
